

MEDIA KIT

The specialized marketplace for bumper-pull and tow-away transportation.

About Bumpster Pull

SHORT DESCRIPTION

Bumpster Pull is a load board and marketplace built only for bumper-pull and tow-away hauling, connecting shippers, dealers and private owners with carriers who tow with a hitch.

FULL DESCRIPTION

Bumpster Pull focuses on one part of transportation: trailers, boats and equipment that move behind a truck on a bumper-pull hitch. Shippers post loads with the details carriers need, such as trailer category, load weight, ball size, connector and brake-controller requirements. Carriers find matching loads, book them, and dispatch their own drivers. Payment is secured when a load is booked and released to the carrier after delivery is confirmed with photos, a receiver signature and the delivery time. Trip Advisor helps drivers plan routes with weather and safe stops.

SUPPORTED CATEGORIES

- Travel trailers
- Cargo / enclosed trailers
- Utility trailers
- Boats
- Jet skis / PWC
- Car haulers
- Equipment trailers
- Other bumper-pull trailers

CARRIER CHECKS

Carriers go through onboarding that reviews federal registration records, operating authority and insurance documents. These checks help shippers make informed choices; they are not a guarantee of safety, performance or legal compliance.
